

## Top 10 reasons to choose iBanx

---

### 1. Strong belief in zero incidents

We believe that zero accidents and environmental spillings are achievable worldwide. The process industry is crucial to today's society but is also still very much associated with pollution and nasty accidents. We will do what is in our ability to create an accident and pollution free world.

### 2. Dedicated to improving the industry's HSE performance

People in the industry want to take responsibility for safety in and around their plant. We provide them with all the means necessary to easily collaborate and keep overview. We believe this is the way to more safety and sustainability.

### 3. Experience in the process industry

Our people have an interest in the industry far exceeding the average and consider it a privilege to contribute to safer and more efficient plants worldwide. They have a technical background and many of them have a history in working in the industry themselves before they came to us.

### 4. Successful in implementing change

Best practices and excellent software solutions are one thing. But being successful in the implementation is another. We designed our implementation method in such a way, that we are sure that when we leave, all involved are informed and have hands on practise with our solution.

### 5. Proven Industry Best Practices

In the 10 years of our existence we worked with over 100 plants on improving HSE performance. This resulted in our proven best practices for the five key HSE processes.

### 6. Combining key HSE processes in one software suite

By putting our five software solutions together into one suite, we created a solution that gives all involved the tools and overview they need in preventing incidents. One time data entry, easy retrieval of history and joint task & action lists save time and money. Process data can be easily combined into reports that help you in taking the right decisions.

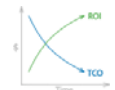

### 7. Focus on results

We keep our focus on the targeted improvement of the HSE performance of our clients. When we understand what the desired HSE results are, our people will continue until these have been achieved.

### 8. Fast return on investment

We understand that plant management is always forced to make choices when it comes to improving on efficiency and HSE. That is why we want our solutions to give you instant results and an ROI that is never longer than one year.

### 9. Up-to-date management information

Our clients like to be in control of the HSE level in their plant. In all our solutions we make sure they get the tools to manage their HSE KPIs and take informed decisions. With personal dashboard they get no more and no less than the information they need to stay in control. The information provided enables them to 'close the loop'.

### 10. Dedicated support

Our support team is dedicated to the procedures and tools we deliver. Each of them has a high level of knowledge and the expertise to help you with the issues you encounter.
